RAWSON'S

SPECIAL CATALOGUE
OF DAHLIAS

RAWSON'S "FRAGRANCE"
SWEET SCENTED DAHLIA
GREEN PLANTS EACH \$2

W. W. RAWSON & CO.
5 UNION ST., BOSTON, MASS.

SPECIAL OFFER FOR 1909

Rawson's "Surprise" Collection

To introduce to the American public the most advanced type of Dahlias and, in our opinion, the most popular form of the future, we offer herewith for 1909

RAWSON'S "SURPRISE" COLLECTION

of three entirely new peony-flowered Dahlias as follows:

H. HORNSVELD. Elegant-formed flowers of enormous size, soft salmon color.

P. W. JANSEN. Deep yellow, of medium size.

QUEEN WILHELMINA. Giant flower of the purest white.

Price, \$1, delivery free. Regular price, \$2.

The above illustration shows a yard which was entirely planted with Dahlias. This yard was awarded first prize in competition with seventy-five other yards for a prize offered by Mrs. John L. Gardner, of Brookline, Mass. This yard is in the center of a most populous town and it shows what can be done with the Dahlia under adverse condition. The Dahlias in this yard were supplied by us.

Rawson's Renowned Dahlias

To commemorate our Twenty-fifth Anniversary in the proper way, we have during the last two years endeavored, and we believe we have succeeded, in offering now to the American public the largest and choicest collection of Dahlias in the world.

We are the recognized leaders now in these goods and have even succeeded in being able to offer to our friends the very introductions of 1909 of the most renowned European growers.

It is no more necessary for the enthusiast of Dahlias, who is always anxious to have the very latest varieties, to look to Europe for same because we believe that our collection comprises everything that is worth while having.

In our collection we combine the introductions and productions of the following countries: England, Scotland, Ireland, Germany, France, Italy, Spain, Denmark, Holland and Belgium, Australia and South America.

We have tried at a large expense to procure for our friends the best illustrations obtainable by having a photographer stationed with us during the season and we believe our catalogue is the best illustrated in the world. The mere description of Dahlias is impossible to give any one an exact idea what the flower looks like.

We have discarded all such varieties which are unworthy and which we believe will not give satisfaction. Every one of the varieties listed herein will be grown for exhibition at Rawson's Dahlia Farm, at Marblehead, Mass., and to this spot we invite every flower lover of America.

If the season should be favorable, we wish to assure our friends that a visit to our farm will amply repay any one who has long distances to travel. You are always welcome, Sundays included.

The Dahlia is a wonderful flower and has made great progress during the last few years. Its popularity rivals that of any other flower in existence.

The New England Dahlia Society is doing some excellent work, in furthering the interest of the Dahlia, by publishing the "Dahlia News," a monthly giving the world's news and many valuable cultural hints on this special flower. The subscription price for this paper is only \$1 per year. For further particulars about this paper, address Maurice Fuld, Secretary, No. 5 Union St., Boston, Mass.

We again give herewith our Revised Cultural Directions for Growing Dahlias

SELECTION OF GROUNDS

The Dahlia is a flower which will succeed even under adverse conditions and it is therefore easy of culture but there are always points which when considered and followed will prove that you can grow a flower better if you give it the spot it likes.

It is a well-established fact that in large places near the sea-shore one can grow Dahlias with much easier care and receive a more abundant supply of blooms. It seems as if the cool moist nights during the latter part of August bring forth the flowers to their greatest point of perfection. That does not say though that Dahlias will not do equally well inland, for they do, but they require a little more care.

Dahlias must have an open sunny position and if possible be protected, particularly from the West so that the severe winds will not tear down the plants and break them just when they are in the heights of bloom.

SOIL

It is an erroneous idea to believe that the Dahlia is a gross feeder and requires well-manured soil for in our experience we have proven that it is just the opposite. It is true that the Dahlia requires a certain amount of food during its flowering season, but we find that it can be better applied from the surface instead of imparting this food to the soil before the roots are planted. The greatest possible success with Dahlias can be had if they are planted on entirely new soil that formerly has been a pasture or grass land. This should properly be plowed during the fall previous. If this has not been done, it should be done very early in the spring.

The sod must be entirely removed and a small amount of suitable dressing may be applied in with soil. The soil should then lie fully two months before the planting should take place. Dahlias will always do better in light sandy soil and if the soil that you are growing in is too heavy, it may easily be improved by mixing in either sand or ashes with the soil.

As stated before fairly rich or over-rich soil is not good for the culture of Dahlias for it will produce a very luxuriant growth of foliage and no flowers.

WHAT AND WHEN TO PLANT

The enthusiasts of the Dahlia are so many and as we find now there are special Dahlia exhibits all over the country, almost in every town of New England and a great many grow Dahlias simply for exhibition.

For this purpose they require an entirely different culture than those grown for Garden or cutting purposes. Let us consider them separately.

DAHLIAS FOR EXHIBITION

The best exhibition flowers are raised from green plants set out during the latter part of May. Green plants are the product of a cutting made during the winter months from a clump of Dahlias which was placed in the hothouse early. These plants require the following treatment. No manure should be placed anywhere near the young plants. The plants should be set out at least four feet each way and a stake should be applied to the young plant to which it should be loosely tied.

Cut-worms often trouble these young plants and in order to prevent their destructive work we advise using "Rawson's Death to Cut-worms," a powder which properly applied will destroy every possible insect in the soil.

The soil around the plants should be stirred daily and if a dry spell should occur immediately after planting an ample supply of water must be given to the plants daily.

The growth of these plants must be thoroughly watched. The only branches which must be allowed on this plant are those emanating directly from the main stem. The other shoots must be immediately removed when they show. If the branches are so near each other that one hides the other it is advisable even to remove some of the main branches.

The light should be allowed at all times to strike every part of the plant. In this way the plant should not have more than six distinct branches from the main stems. The staking of these plants should receive very minute attention. If your plants are all grown in one row, we would advise to connect each main stalk with a cross bar to the other.

Green plant, ready to set outdoors

This will give you an opportunity to tie the branches of each plant in its natural way of growing to the cross-bar and the wind will have no effect on the plant. When the buds appear which usually are three in number, the two buds on either side should be removed and allow but one flower to be the termination of each individual branch.

The consequence is that concentrating all the strength and fertility of the plant into one, a specimen is produced which is perfection of type.

Just as soon as the plant has reached the height of 20 inches, it is well to procure some thoroughly rotted stable manure and place same in thickness of 4 inches around the bottom of the plant to extend about a foot each way.

This manure should be watered down regularly every day. When the buds begin to swell, it is well to remove this manure entirely and apply to the soil about twice a week some weak lime water. About three days before exhibition to bring forth the very best that is in the plant one may apply to the soil liquid Nitrate of Soda. The portion to be dissolved in water is one ounce to five gallons. One quart of this liquid is sufficient for each individual plant.

Protection of Bloom

About a week before the exhibition, in order to save those blooms which are on the plant, it is essential to protect the flowers either from rain or from the burning sun.

This can be done either by spanning a small umbrella over the individual flower or by building a little glass house which may be erected on a stand and in which the flowers may extend. The latter is the method used in England and has proven very successful.

The cutting of flowers for exhibition should take place late at night, previous to the day of exhibition. They should be put immediately in water and placed in a cool spot. In the morning they may be packed and taken to where they are supposed to be exhibited.

The proper selection of varieties for this purpose must be borne in mind because ever so many varieties of Dahlias are not suitable for exhibition. A flower in any exhibit is judged upon its merits in regard to size, perfection and color and we believe that it would be of benefit to our friends to have what we consider the ideal selection for exhibition purposes.

Our recommendation is as follows:

DECORATIVE

SOUVENIR GUSTAVE DOAZON, deep scarlet; DELICE, soft pink; MME. VICTOR VASSIER, yellow; JEANNE CHARMET, deep pink; GIGANTEA, yellow; MME. HELENE CHARVET, pure white; PAPA CHARMET, maroon; GORGEOUS, crimson; MME. VAN DEN DAEL, pink and white; COMMANDANT RIVOIRE, carmine with violet reflect; PROFESSOR MANSFIELD, variegated: FIREBURST, bright crimson.

CACTUS

In white there is YVONNE CAYEUX, ARMINSTEIN, MANIFESTO. In yellow there is T. G. BAKER, CARADOC, HAROLD PEERMAN. In soft pink, DOROTHY, MARGUERITE BOUCHON. In deep pink, ELLA KRAEMER, ELYSIAN, GONDOLA, IRIS. In bright scarlet, ARISTE GÜRTLER, LORD OF THE MANOR, ROLAND VON BERLIN, LUSTRE, IGNEA. In deep crimson, COLONEL MOLYNEAUX, NELSON. In maroon, there is DREADNOUGHT and in amber there is MASTER CARL. In bronze there is LUCIFER.

Dahlias for Garden Culture

The Roots of the Dahlia. We endeavor herewith to enlighten the public upon the different styles of roots.

In the first place we wish to reiterate that it is absolutely wrong to plant an entire clump of Dahlias. All that should be planted at any time, is either a single tuber with a sprout attached or a set of tubers which only has one sprout.

If the old roots are carried over and it is the desire that they be planted, we would advise placing the clump either in ashes, moss or soil during the middle of April and have same thoroughly moistened; the sprouts will soon appear. Just as soon as they are noticeable it is well to divide the clump. The easiest way to do this is to make first one single division through the center of the main stem and crown. Then take the separated parts and divide them again in the same fashion.

Wherever a single tuber can be detached with a sprout attached, this should be done and this by far makes the best plant for garden use. During the later years the demand for the Dahlia has increased to such enormous volume that it has been simply impossible to increase the stocks of dry roots enough to supply all, particularly of the choicest and newer sorts.

The growers have therefore to resort to the quicker methods of multiplication; in consequence we offer a great number of pot roots. That these are equally good, if not better than the field roots, we wish to assure our friends and are we willing to guarantee them in regard to results.

In some instances where the introduction has been so recent that it is simply impossible on account of the high price to offer dry roots, we are compelled to offer plants. The result of plants is fully equal to either the field-grown tuber or the pot root and we are again willing to guarantee the result.

The time of planting should be from May 15 until July 1, the last ones planted often proving earlier to bloom and the best. This is of course due to peculiar weather conditions.

Garden Dahlias do not require more than three feet of space between the plants. The roots should be laid horizontally, three inches below the surface, and again we wish to advise not to place any manure or fertilizer into the soil during the time of planting.

Just as soon as the sprouts appear above surface, the ground around the plant should be carefully stirred and the soil between the plants must be cultivated. This should be done regularly.

Plants should be treated with "Death to Cut Worms" immediately as they appear above the surface to prevent the cut-worm from doing any harm.

Stakes should be applied just as soon as the plants are large enough to be tied to the same. Certain plants have a tendency to branch out too freely and it is advisable to have some of the branches removed so to allow the light to strike all parts of the plant. If the weather is unfavorable and rain is not abundant, it is essential that the plants be thoroughly watered. This should always take place after the sun has disappeared, and it is then well to spray the foliage as well as the soil.

During the last year, on account of the extremely dry season, a certain insect attacked the Dahlias and resulted in a most diseased looking growth establishing itself, keeping the plants from either producing their true flowers or no flowers at all.

We thoroughly experimented during last season and though not being successful at that time in subduing the insects, we have discovered that if the plant is looked after immediately upon the appearance of the insect, the insect can be killed and the plant will not be harmed.

The insect appears like a tiny green louse on the under surface of the leaves. Kerosene Emulsion applied with a strong sprayer underneath the leaves and copiously watering the plant every evening thereafter will rid your plants of this insect. There are other insects that attack the Dahlias, and to destroy them or keep them away, we offer the following remedy.

Just as soon as the plant seems to be sufficiently established, we advise that twice a week, late in the evening, the plants should be sprayed with a very weak solution of Paris green. This not only destroys the insect but it keeps the plants clean and is a great fertilizer.

When the plants have attained a height of 18 to 20 inches a layer of thoroughly rotted stable manure may be placed around them and this should be thoroughly watered every day.

Tie your plants carefully to the stakes and when the first buds appear pick them off as invariably the plants are too weak to produce perfect blossoms. Dead flowers should always be removed promptly so as not to waste any strength of the plant.

We wish particularly to call attention to certain varieties of Dahlias which are especially suitable for effect in a garden—that is, which produce an enormous amount of bloom and therefore create quite a color effect.

Many Cactus Dahlias—those termed Lilliputian Cactus—are especially adapted for this purpose. They are Dahlias that grow only 20 inches high and are usually completely covered with medium-sized, but perfect blossoms. These plants do not require staking and can be used with splendid effect in beds backed by shrubbery.

Other varieties suitable for effect are as follows:

CACTUS

ALFRED VASEY, COUNTESS OF LONSDALE, VULCAN, MRS. DE LUCA, AMOS PERRY, WUNDERKIND, WEISSE DAMA, RENÉ CAYEUX, AURORA, J. H. JACKSON, W. B. CHILDS, KHAKI, MABEL NEEDS, etc.

We gladly supply any further information on this subject

The Ideal Pot-root

DECORATIVE

KAISERIN AUG. VICTORIA, CAMELLIA, JEANNE CHARMET, W. W. RAWSON, PAPA CHARMET, MRS. ROOSEVELT, FIREFLY, MME. A. LUMIERE, FIREBURST, FLORA, JUMBO, LA FRANCE, MME. VICTOR VASSIER, DELICE, PERLE DU PARC DE LA TETE D'OR, MRS. STUYVESANT FISH, SOUVENIR DE GUSTAVE DOAZON.

Trueness of Varieties

We could not be more painstaking or critical in regards to this point, and shall at all times try to ship out only such roots as are absolutely true to name. **Substituting is done only** when our customers expressly desire it. Unfortunately, like all human beings, we are subject to mistakes, and are willing to replace all varieties which are found untrue with the proper sorts another season.

Delivery of Roots or Plants

Dry roots, either pot- or field-grown, are delivered about April 15; green plants, May 15.

Free Delivery

Either Dahlia roots or plants are delivered free to any post or express office in the United States at the prices quoted herein.

Field Roots of Different sizes, equally good

Rawson's Introduction of Dahlias for 1909

PLEASE ORDER BY NUMBER ONLY

These are our own creations of superior merit and cannot be purchased anywhere else

7185 MISS GERALDINE FARRAR. (By special permission of Miss Farrar.) The decorative form and the color of this flower is distinct and original and unlike anything we have ever seen. The form is that of a full double peony, blown open. The petals are very massive and broad and remain fresh-looking for an exceedingly long time. The plant itself is rather dwarf, $3\frac{1}{2}$ feet high, but produces quite a large number of these giant blooms, often 7 inches across. The color is that of a fresh rosy pink, modestly flamed white toward the tip of the petal, giving the flower a most pleasing appearance. This variety will be a surprise to every Dahlia lover and, no doubt, will become extremely popular. Green plants only (delivery May 15). \$5 each.

7375 MRS. KATE SANDERSON BARLOW. (See illustration.) Decorative Dahlia of the purest white. Its distinctive features are: the purity of color, the perfect form and the immensity of size. We claim it the best white decorative in existence, even far superior to Mlle. Helene Charvet. The plant forms excellent bushes, which abound in production of these large white flowers on exceedingly long stems. Green plants only (delivery May 15). \$5 each.

We also issue a special catalogue on Pæonias and Gladiolus.
Are you interested?

- 9085 GEORGE ADE.** We are pleased to have been given the permission by Mr Ade, who is a great lover of Dahlias, to name this flower accordingly. In form this novelty is identical to that ever-popular introduction of our own, the Decorative Dahlia "W. W. Rawson," but in color it is different from any other we know of. The shade is absolutely unknown in flowers and is difficult to describe. While the flower represents one color its shading from center outward gives it several hues. The center may truly be described as deep bronze, shading gradually to old gold and continuing until the tips may be termed deep salmon. The flowers measure fully 6 inches across and are borne on erect, long stems. In a natural or artificial light, we have yet to see a more effective flower. Green plants only (delivery May 15). \$5 each.

THE FIRST REAL SWEET-SCENTED DAHLIA

- 11400 "FRAGRANCE."** This creation alone makes us feel proud and we believe we have here the forerunner of an entirely new race. The flower, as illustration shows, is of the giant single form and cup-shaped. Its flowers are borne on stems which are away from the foliage and can easily be cut 15 to 18 inches long. The fragrance is very pronounced and that of a honeysuckle. The color is pure white, with a large yellow disk. For cutting or mass effects outdoor this is unexcelled. Plants grow 6 feet high and bloom abundantly from August 1 onward. Green plants only (delivery May 15). \$2 each.

1 *Ianthe* (see page 25), 2 *Comet* (see page 18),
3 *Ella Kraemer* (see page 21)

Two New Single Dahlias of Colossal Size

This type is a creation of our own and most distinct. The form and coloring of the flower is original and very pleasing. We are endeavoring to create an entire set of colors of this class, and shall adopt the names of towns to name them with, so they can easily be recognized.

11850 THE HUB. Flowers are never less than 5 inches across and often 6 inches. The petals are broad and massive and have a light-colored base, thereby creating a perfect ring in the center, which gives the entire flower a surprising beauty. Color deep rose, edged and tipped white, with a very broad base of yellow, changing to white; the petals are pointed toward the tips, producing a star-like effect. Plants grow 4 feet high and have a luxuriant light green foliage. We are certain every Dahlia connoisseur will admire this novelty. Green plants only. \$2 each.

11800 CAMBRIDGE. In form and size this variety is identical with the above, but its color is most unique, a true Harvard crimson, with a broad golden ring in the center; the effect is marvelous. Height of plant, 5 feet. Green plants only. \$2 each.

Stredwick's English Introductions of 1909

Stredwick's Cactus Dahlias have the reputation of being the very choicest introduced. Up to now it was impossible to procure any roots of Stredwick's introductions until two years after the first offering. A novelty then has lost much of its charm and value. To be able to offer these choice varieties simultaneously with the introducer means progress for the American Seedsman.

Cactus Dahlias

We furnish "plants only" of the following varieties at \$5 each

- 4975 SATISFACTION.** A very beautiful flower of the most incurved type. Even amongst the most lovely tints now to be seen in Dahlias this stands out as one of the most exquisite. The florets are long and narrow throughout, the center although extremely deep is never heavy but of the most approved filbert shape. The shade is a clear and beautiful rose-pink approaching to white in the center. Height 4 feet.
- 4980 SAXONIA.** In this we have a splendid deep crimson which will give entire satisfaction. The flowers are large and well-formed with fine florets, and they are carried on long stems. Plants are robust with dark green foliage. Height 4½ feet.
- 5515 TEUTONIC.** In striking contrast to those varieties which are of irregular formation, this flower is neatly made, every floret being evenly incurved, and these continue right to the center. The plants are of wiry growth; healthy but not gross. It is difficult to exactly describe the color which has been given as amaranth-crimson with ruby-red shading. Height 3 feet.
- 5717 WELLINGTON.** With so many lighter shades now to be seen in Cactus Dahlias, flowers of darker coloring are more than usually welcome, and in this we have a bright glowing crimson scarlet, with a shade of purple towards the tips of florets. Flowers are of good size, incurving form and are all produced on long stems. The plants are erect, strong and healthy growers.
- 1105 DEBUTANTE.** A capital exhibition variety of first-rate form, having narrow and very pointed florets which are well incurved, somewhat claw-shaped and arranged regularly. The coloring is very beautiful, being a very light tint of soft pink at the base, but the upper more incurved portion of the florets is white, which gives an exceedingly pretty effect. The plants are fairly tall growers and need but little thinning. Height 5 feet.
- 5185 SNOWDON.** This being a grand flower of the purest possible white. The blooms are large and possess a great quantity of petals which are long and narrow. The habit is extremely good, every flower stem being long and wiry. Amongst the many varieties which we have distributed, this will take its place as one of the finest. Height 5 feet.

Mann's German Introductions of 1909

- 5675 VULCAN.** A fine cactus for garden decoration and cutting; color orange-scarlet, shaded a little darker in the center. Its main quality is its extreme freeness of blooming, rivaling the well-known Countess of Lonsdale. Plants.
- 5715 WEISSE DAME.** Undoubtedly the best, most free-blooming, white Cactus Dahlia in existence. The flowers are borne in unlimited profusion. Flowers keep excellent after being cut. Plants.

Creation of Other Growers, But Offered for the First Time in 1909

DECORATIVE DAHLIA, JACK ROSE. (PEACOCK.) The valuable features of this novelty are so many that no doubt it will become the ideal Dahlia for cut-blooms in the future. A word about its name. If there is a flower today that in color can better compare with that of the Jack Rose, we fail to know it. Every shading this rose possesses can be easily noted on this Dahlia. In form it is that of an open, flat rose, but always well filled in the center. Size of bloom from 5 to 6 inches; height of stem for each individual bloom, 2 feet and over. Exceedingly free-blooming and has the best lasting qualities after being cut of any variety we know of. Flowers properly treated will last from 10 to 12 days. Strong young plants, \$1 each.

SHOW DAHLIA, DREER'S WHITE. (DREER.) This Dahlia was exhibited last fall at Boston, at the Dahlia

Dreer's White, continued

show of the New England Dahlia Society, and easily created a sensation for the intense purity of white. Its form is that of the Grand Duke Alexis, with the addition that the center is greatly improved and the size of bloom is somewhat larger. The flowers are borne on exceedingly long stems, and have good, lasting qualities. Strong young plants, \$1 each.

- 7205 MISS VIRGINIA MAULE.** (PEACOCK.) Is nearly as large as Mrs. Roosevelt, with the delicate pink tint of Mrs. Gladstone and the beautiful white base of petal resembling Nymphaea. The plant is strong and vigorous, growing 4 to 5 feet high; branching habit; blooms early and profusely; an excellent cut-flower. Green plants. 75 cts.

Our Own Introductions of the Past Season

DECORATIVE DAHLIAS

- 7900 W. W. RAWSON.** The popularity which this novelty has acquired in this short time speaks in itself for the superior features of this flower. This variety was exhibited in Germany and England last season and was very much admired. The massive, perfect but graceful flowers, which often measure 7 inches in diameter, are borne on stiff, erect stems 15 inches and longer. The petals toward the center are quilled similar to Grand Duke Alexis, toward the outer part they are more open and flat. The entire flower is absolutely perfect in outline and formation. The color is pure white, overlaid with amethyst-blue; this wonderful combination gives it the appearance of a delicate lavender. Green plants only. \$1 each.
- 7410 MRS. STUYVESANT FISH.** Rich deep amber. The first Decorative Dahlia of this color; the flower is gigantic; often 7 inches in diameter, perfect in formation, very double; petals are medium broad and gracefully curved. The plants grow 4 feet high and with fair treatment produce masses of flowers quite early in the season. Green plants only. \$2.50 each.
- 6440 FIREBURST.** To our knowledge the largest Decorative Dahlia ever offered. It is a seedling of Le Colosse; has broader and longer petals, is more flatly built, but a far more intense scarlet, slightly shaded orange, and produces specimens which measure 8 inches and over. Flowers are borne apart from foliage; a great value. It is absolutely distinct, and must be considered a great novelty. Last season this was the most free-blooming Dahlia on our fields. Height 3½ feet; plants spreading 3 feet. Green plants only. \$2 each.

SHOW DAHLIAS

- 9200 GOVERNOR GUILD.** The largest and purest white Show Dahlia in existence. The color is the most snowy white, without even the least suggestion of any other shade, either at base of petal or center of flower. The flower is perfect in shape, full and round, built loosely of most exquisitely fluted petals, giving the flower a far more graceful appearance than Show Dahlias usually have. The spread of the flowers is 5 inches. They are borne on very long, erect stems, and appear far above the foliage. Plants grow 5 feet high and are most profuse bloomers. Green plants only. \$1.50 each.
- 9840 MRS. GORDON ABBOTT.** A giant in size and distinct in coloring. We had several specimens last fall which measured from tip to tip $5\frac{1}{2}$ inches. The color is brightest golden, mottled, speckled and striped intense scarlet, a combination which must attract any one who sees it. The flowers are well formed, very full and double. The outer petals flatten when the flower comes to perfection, giving it a large appearance. It is without doubt the brightest and largest fancy Dahlia offered in America. Green plants only. \$1 each.
- 8970 EDWARD LE FAVOUR.** Deep rose, shading to a most pleasing pink. The shade of pink is absolutely distinct and of such an attractive hue that it is destined to become most popular. The flowers are perfectly globe-shaped, measuring 4 inches and over, and are produced in great abundance on bushy plants 4 feet high. A bouquet of these Dahlias produces a most showy effect. Green plants only. \$1 each.

General Collection of Cactus Dahlias

PLEASE ORDER BY NUMBERS ONLY

410	Aurora. One of the best Dahlias for exhibition; colossal in size; elegant in form; most perfect in type and of the most exquisite coloring; attractive soft pink, slightly tipped white, the heart of the flower brilliant golden...	EACH \$1 00
420	Austin Cannell. Rose, shaded lighter at tips.....	20
430	Australian. Rich purple; a large, bold flower florets long, slightly incurved; stems stiff. Green plants only.....	1 00
500	Banquise. Plant dwarf and bushy, carrying a multitude of pure white flowers; excellent for pot culture.....	2 50
510	Beatrice. Pale rose, shaded lighter toward the tips....	15
530	Beauty Anversoise. Distinct form of flowers; petals narrow, twisted and incurved to such a degree that the center is almost hidden; the color is brilliant crimson, white tips; flowers large.....	50
540	Bella. Deep golden-buff ground, heavily edged with deep lilac-rose, the center deep rose; a large full flower of good shape and beautiful color.....	50
560	Bernardo Antunes. A distinct color; soft salmon heavily striped and speckled crimson, the tips of petals are a soft carmine-rose. Green plants only.....	2 50
580	Bessie Mitchell. Yellowish orange, suffused with salmon or pinkish red; a large finely formed flower.....	25
590	Blanche de Sommer. A magnificent variety, which produces large flowers of a creamy white; broad petals....	2 50
600	Blitz. Fiery scarlet; a good bedding sort.....	50
610	Blush Queen. The flower has a splendid new combination of colors; clear, bright, rosy pink, with a creamy white center, carried on long upright stalks, well above the foliage.....	50
620	Blutenregen. The name implies a shower of bloom; this is true; quite early it begins to throw up a multitude of purplish red blooms and simply exhausts itself in blooming, but not before frost appears.....	50
630	Bornemann's Liebling. Quite new. A most delicate pink, shading to pure white in the center; flowers perfect and excellent for cutting.....	25
640	Brautjungfer. For a delicate coloring nothing has yet been seen to equal this variety. The entire flower is a delicate blush-pink, fairly large and extremely full and double. Plants grow 5 feet high and throw the flower-stems far above the foliage.....	50
650	Brema. Soft pink, center white.....	50
660	Bridesmaid. Cream-colored, turning into sulphur toward the outer part of the petals, extreme edges delicate pink.....	25
670	Brilliant. Bright crimson; of excellent form.....	25
680	Brilliant Lila. The flowers are of medium size and of the purest lilac color.....	1 50
690	Britannia. A delicate shade of soft salmon-pink, passing toward base of petal to apricot; free blooming.....	20
700	Bruce. Very early and free-blooming, on strong long stems. Florets composed of fine florets and in color a light yellowish orange. Green plants only.....	1 00
710	Brunhilde. Crimson-purple.....	25
720	Butterfly. Most attractive on account of coloring; chocolate-crimson, distinctly tipped white; excellent form; large flower; quite new.....	1 00
730	Campaigner. Deep salmon-red, with petals tipped with rose color; very pretty flowers of medium size and with very acutely pointed petals.....	35
740	Cannells Crest. Beautiful cherry-red; a free bloomer..	20
750	Capt. Broad. Brightest scarlet, with no shading whatever. Good large flower.....	35

Cactus Dahlias, continued.

760	Caradoc. One of the best yellows, bright and clear without shading; long narrow florets, slightly incurved stems, long and stiff. Green plants only.....	EACH \$2 00
770	Carmen Sylva. Deep rose, pink center.....	30
771	Celia. (1908.) Rich pink, blending to blush at tips; center rosy blush with yellow base. Green plants only.....	3 00
772	C. E. Wilkins. (1908.) Bright clear salmon-pink, over-laying yellow; this variety won all the highest prizes in 1907, flowers have immense stems and are extremely large. Green plants only.....	4 00
775	Chas. H. Curtis. (1908.) Rich scarlet-crimson; a large full and strikingly incurved flower. Green plants only..	4 00
780	Charm. Yellow at the base of petal; then red with heavy white tips at edges; long petals; blooms freely.....	50
790	Chaters Mather. Lemon-yellow, shaded orange.....	1 50
810	Citizen. Deep maroon, shaded purple; erect grower, blooming well above foliage; a striking variety.....	50
820	Citronenvogel. Plants grow but 18 inches high; are built so as stems can be seen and are completely covered with perfect but small lemon-yellow flowers.....	75
830	Clara. (1908.) The fully developed florets of this variety are soft mauve, the extreme tips being white, with a faint edge of mauve. Green plants only.....	5 00
840	Clara G. Stredwick. Clear bright salmon; large flowers, with narrow petals of great length and freely produced; dwarf wiry habit.....	35
860	Clincher. Gigantic cactus of great depth and immense volumes of petals; outer petals heliotrope, gradually lightening to white in the center. A dandy exhibition sort. Green plants only.....	2 00
870	Cockatoo. Ground color, clear yellow which towards outside of flowers assumes a pale fawn tint; every petal tipped white; a good exhibition sort. Green plants only.	75
875	Colada. (1908.) Rich carmine-cerise, shading to crimson at tips; fine for exhibition. Green plants only.....	3 00
880	Colonel Molyneux. Bright crimson, with refined narrow petals. Green plants only.....	3 00
890	Columbia. Bright scarlet, distinctly tipped with white..	20
900	Comet. The largest fancy Cactus Dahlia; beautiful sil-very, rose ground, splashed and striped with crimson..	20
930	Conrad. Terracotta-red, streaked with yellow; a flower of the largest size; long narrow petals.....	50
940	Conservateur Lefebvre, Bright dawn, colored with lighter center, the entire flower suffused heliotrope; tips of petals golden-yellow.....	3 00
960	Cornucopia. Deep reddish salmon; large bold flower, with very fine petals.....	50
970	Coronation. Glowing red, very pointed petals; flowers small and carried erect on wiry stems. A gem for cut-ting.....	50
980	Countess of Kenmare. A magnificent exhibition sort and an excellent color; petals very fine and long, and of an amber, suffused with orange. Plants only.....	2 00
1000	Countess of Lonsdale. For perfection of bloom, size and erectness of stem; abundance of flowers and general use as a garden flower, although quite old, this variety has never yet been equaled. On several of the plants we counted over 150 perfect blooms at one time. Is there any other garden flower that can equal it? The color is a rich salmon, tinted apricot.....	15
1010	Countess of Malmesbury. Delicate peach color; pink florets, long and narrow, curving inward; flowers free; good both for garden and exhibition. Green plants only.....	3 00

- 1020 Country Girl.** Deep golden yellow, bright amber tips; EACH
the bold flowers appear very early and remain large
right up till frost. \$0 75
- 1030 Crayfish.** An elegantly formed and highly refined
flower; the florets being so much incurved as to almost
meet in the center; these are exceptionally narrow, and
the flowers very large. 50
- 1040 Crepuscule.** Pale orange-yellow, the outer petals deep-
ening to deep amber-buff; refined flower of beautiful
shape; large, extremely early and very free-blooming;
excellent for exhibitions. 50
- 1050 Crespy.** (1907.) Very pale heliotrope to almost white in
center; fine for exhibition. Green plants only. 3 50
- 1060 Cycle.** Ruby-red, shaded carmine. 25
- 1065 Cynthia.** (1908.) Old gold, shaded pale red, with center
and tips bright yellow; a grand exhibition flower.
Green plants only. 5 00
- 1070 Dainty.** The name is well applied; yellow ground, suf-
fused pink, golden tips; most delicate-colored Dahlia. 35
- 1090 Daisy Easton.** Deep rich yellow; a flower of exceptional
beauty; it is a large, deep, incurving form, and never
shows the center; has a good stem and strong in habit. 50
- 1095 Daisy Staples.** (1908.) Mauve-pink flower; of good
shape; medium size. Green plants only. I 50
- 1100 Das Marchen.** Exquisite pink, with greenish yellow
at the center; petals rather broad and thick; good for
exhibition. 50
- 1110 Decima.** Buff-yellow, suffused and edged with bronzy
rose; large flower. 50
- 1120 De Fresno.** Yellow, suffused bronze- EACH
salmon. Green plants only. \$2 00

Die Unschuld (see page 20)

Cactus Dahlias, continued.

- | | | |
|----------------------------------|--|----------------|
| 1130 Delicata. | A distinct form of flower; saucer-shaped, the petals run the same width almost to the tip; color a most delicate blush. | EACH
\$1 50 |
| 1135 Delicatissima. | (1908.) Pale apple-blossom-pink; flowers free; a garden Dahlia, especially for cutting. Green plants only. | 3 00 |
| 1140 Delight. | Palest pink, with yellow center. | 50 |
| 1150 Delphine Boucarut. | Flesh-pink base; petals citron. Green plants only. | 2 00 |
| 1160 Demon. | Maroon with crimson center. | 75 |
| 1170 Depute Ch. Deloncle. | Aniline-violet, reflecting scarlet. Green plants only. | 1 50 |
| 1180 Diavolo. | Coloring unique, the ground being yellow at base to white; the upper portion being suffused with rose, the whole thickly splashed, speckled and striped with chocolate and crimson. Green plants only. | 2 00 |
| 1200 Die Unschuld. | New 1908. Of German origin and received the highest award when exhibited at Berlin. The entire plant is distinct; foliage is short, thick and | |

Die Unschuld, continued.

- very lustrous; the stem and branches are fleshy and robust, the entire plant compact and dwarf; the flowers which possess the greatest substance known are fairly large, extremely double and belong to the class known as Cactus Hybrids; stems average 15 inches and throw the flowers far above the foliage; color creamy white; this variety should be in every collection. \$2 50
- 1210 Directeur Quennec.** (1907.) Yellow, speckled white. Green plants only. 2 00
- 1220 Docteur Mene.** Very free-flowering, of great vigor; flowers are carried far above the foliage; salmon-amber, shading to sulphur-yellow in center. Green plants only. 2 50
- 1230 Donald McDonald.** Pale primrose; a new shade. Green plants only. 2 50
- 1240 Dorothy.** Very much admired on account of its lovely silvery pink color, effectively brightened by the showing of the tiny white tips of the reverse of the petals; the flowers are of good size, deep and well formed. Plants only. 3 50
- 1245 Dreadnought.** Deep crimson-maroon; immense flowers of a refined form. The best dark for exhibition use. Pot roots. 1 50
- 1247 Dr. G. G. Gray.** (1908.) The narrow needle-pointed florets of this variety will curve and intermingle, forming blooms of great beauty. The color is fiery crimson-scarlet, without shadings. Green plants only. 5 00
- 1250 Druid.** Snow-white, tinged lilac. Green plants only. 1 50
- 1260 Duchess of Hamilton.** Pure sulphur, flushed pink. Green plants only. 1 50
- 1270 Dudley Hardy.** A giant flower of dark salmon-pink; long incurved petals. 1 00
- 1280 E. Cadman.** Indian-red florets, straight; good for exhibition. Green plants only. 3 00
- 1290 Edelweiss.** White; Lilliputian Cactus 1 00
- 1300 Edith Groom.** Pure white; excellent form and habits. 50
- 1330 Effective.** This is quite a distinct color in Dahlias; it is a deep amber, with rose-colored center. 35
- 1340 Elate.** (1907.) Pinkish mauve, softly blending to a pale yellow in center; very fine for exhibition also very free in blooming. Green plants only. 1 00
- 1355 Electric.** Enormous flat flowers of a pure white, slightly flushed flesh-pink and light yellow center, one cannot help but be attracted to this variety whenever grown. 25
- 1360 Ella Kraemer.** Clear rosy pink, lighter at the base of petals; large flower of excellent shape; free and distinct. One of the best Cactus Dahlias of recent introduction. 35
- 1370 Elis.** Apricot and peach-colored; very decorative and odd. 35
- 1375 Elsa Ellrich.** (1908.) Color pearly white, slightly tinted blush in the early stages; florets long, narrow and tapering, forming a large refined flower with an ideal center. Green plants only. 5 00
- 1380 Elsass.** Very large blooms of fine petals appear freely; color a lake crimson. 50
- 1390 Else.** Salmon-pink, slightly suffused yellow; very free-blooming; of Cactus Hybrid type. 50
- 1400 Elysian.** (1907.) Bright pink; yellowish base to petals, center silvery rose, very long, slightly incurved petals. Green plants only. 2 00
- 1410 Emperor.** A lovely tint of pure plum color, quite velvety in texture; the base of every petal is pale yellow, which contrasting well with the dominant color and lightning up the interior of the flower has a pretty effect. 25

Cactus Dahlias, continued.

- | | | |
|------|---|----------------|
| 1420 | Empress of Austria. Brilliant, rich crimson-maroon; very large exhibition flower, with elegant fluted petals. | EACH
\$0 30 |
| 1430 | Encore. A most lovely variety; color a warm shade of orange-buff, with lighter center; perfect habit; very free and bearing its large narrow-petaled flowers on long wiry stems carried well above the foliage. | 1 00 |
| 1440 | Epopée. Crimson in center, to carmine at points of petals; very large flowers; fine for exhibition. | 75 |
| 1479 | Erica Bornemann. Rose, white center. | 20 |
| 1480 | Erlkönig. Light saffron, lighted orange. | 1 00 |
| 1500 | Ethel. Sulphur-yellow. | 35 |
| 1510 | Ethel Pearson. Soft pale pink, with yellow base. | 2 50 |
| 1520 | Etna. Lilac suffused violet; blooms large and free. | 50 |
| 1530 | Etoile De Neuville. (LILLIPUT CACTUS.) Plants grow only 18 inches high, very bushy and are always loaded with small but perfect flowers of vivid chestnut-red. | 1 00 |
| 1540 | Etruria. A most beautiful exhibition Cactus. The color is difficult to describe, a reddish russety apricot, resembling autumn-oak foliage; in fact a vase with autumn-oak foliage and this flower makes a wonderfully effective combination. Plants. | 2 00 |
| 1550 | Eva. Pure white flowers of pleasing form; petals regularly and neatly curved. | 20 |
| 1450 | Erbprinzessin Von Reuss. Enormous flowers, with long and pointed petals; blood-red, shading to maroon. | 50 |
| 1560 | Eugenie Bonvallet. Deep red, straight stiff stems carry flowers far above foliage florets very fine; a good plant for cutting. Green plants only. | 2 50 |
| 1570 | Eureka. Rich velvety violet-crimson to dusky purple in center, large blooms of finest form. Splendid for exhibition. Green plants only. | 4 00 |

4630 Queenie	(1908.) Bright pink, yellow base; an immense flower. Plants.....	3 50
4640 Rainbow.	Soft pink, somewhat paler in the center; florets long and inclined to curve.....	50
4660 Rakete.	Bright scarlet.....	35
4670 Raymond Parks.	Rich deep crimson color; petals large and beautifully incurved.....	30
4680 Recam.	(1908.) The finest dark flower, from deep maroon in the center the color brightens to a rich dark crimson. Petals are long, narrow and pointed; especially recommended for exhibition. Plants.....	3 00
4690 Red Cap.	Refined vivid crimson-scarlet.....	50
4700 Reduplicata.	Original composition of flower; the florets which are nearly tubed have within their folds another floret of similar formation, but smaller in size. Color cherry-red, edged white.....	3 00
4710 Referee.	A clear, bright, soft, terra-cotta color; petals needle-pointed, slightly incurved; flowers immense. Plants.....	3 00
4740 Rene Cayeux.	One of the best free-blooming Cactus Dahlias introduced of late. The plants at our farm last season were literally covered with blooms from July until frost. The flowers are quite large, of a beautiful ruby-crimson and are borne on very long stems, which have a grace of bearing. Plants only.....	1 50
4750 Renee Millot.	Magnificent form, offering to the eye a shading resulting from the following combination, bright rose, white, yellow and heliotrope; excellent for exhibition. Plants.....	2 00
4760 Rev. Arthur Bridge.	(1908.) A grand exhibition flower, producing its flowers on erect stems, coloring exceedingly beautiful, being a bright yellow, heavily tipped with deep rose-pink. Plants.....	5 00
4770 Rev. Arthur Hall.	(1908.) A champion Cactus; flowers of the largest size, long, very narrow; florets which incurve; color ruby-crimson, relieved at the points of petals by showing the lighter tinge of the reversing color; flowers are carried erect on long stems. Pot roots.	3 00
4780 Rev. C. F. Digby.	(1907.) Cerise-pink, long straight petals; large flower. Plants.....	3 00
4790 Rev. Dr. Baker.	Clear plum color, flowers free and stems are long.....	3 00
4800 Rev. D. R. Williamson.	Deep velvety crimson; habit good, stem long, black and wiry; a distinct flower.....	75
4820 Richard Heald.	Coral-red.....	1 00
4830 Ringdove.	Fawn, tipped pink.....	30

Cactus Dahlias, continued

- 4840 Ritter Blaubart.** (1906.) Pure deep violet, a most unique shade. Plants grow but 2 feet high and produce an unlimited quantity of perfect flowers late into fall... **EACH \$0 75**
- 4850 Roland Von Berlin.** (1906.) Undoubtedly the best scarlet Cactus Dahlia. Bushes grow 2½ feet high and throw their brilliant scarlet flowers at least a full foot above the foliage. The individual clear flower-stem often measures 18 inches; excellent for cutting..... **50**
- 4855 Rosa Starr.** (1908.) Bright lilac pink; blooms large, full and constant and stand well after being cut. Plants..... **3 00**
- 4860 Rosea Superba.** One of the best Cactus Dahlias for cutting, the massive flowers are borne in great profusion, a single flower on a stiff, erect stem. Flowers are quite large, perfect and of a lovely rose-color..... **1 00**
- 4870 Rose of Kilvarock.** A lovely, bright, rich cerise, passing at the base of petals to a beautiful light yellow; exceedingly narrow, long incurving petals; stems long and erect. A most elegant and refined flower; gem for exhibition. Plants..... **3 00**
- 4880 Rosenkrone.** White margined, tipped pink..... **1 00**
- 4890 Rosine.** Currant-red with violet tip..... **40**

- 4900 Rosy Morn.** A large flower of excellent form, and very constant. In color it is a peach blossom, somewhat paler in tint toward the base.....\$0 50
- 4910 Rozenhagen.** Soft lilac..... 35
- 4920 Ruby.** Rich ruby-red; very free..... 1 00
- 4930 Ruby Grinsted.** (1907.) Center soft, tinted yellow, gradually suffused to a rich shade of rosy fawn, the outer incurving petals being light salmon-pink on the reverse; blooms large, bold and striking. Plants.... 3 00
- 4935 Ruth Forbes.** (FORBES.) A wonderful Dahlia which must become extremely popular. The massive clear pink flowers composed of heavy petals, are often accompanied by stems measuring 3 feet in length, extra stout, and excel any other variety for large vase purpose. At the last exhibition of the New England Dahlia Society a large vase of this flower created a sensation and was the admiration of every visitor. The first flower of every plant appears imperfect, but every succeeding flower improves until frost.....
- 4940 Saba.** Soft flesh-pink with broad petals; flowers free and keeps well after being cut..... 2 50
- 4950 Sambo.** Very dark maroon flowers, deep and large. Stems black..... 1 00
- 4960 Sandpiper.** Scarlet, shaded orange; extremely long narrow petals, perfect center..... 35
- 4970 Sandy.** Golden-orange, suffused with fawn..... 1 00
- 4990 Sceptre.** Golden yellow, tinted pink..... 1 00
- 5000 Schneewittchen.** The finest pure white Cactus Dahlia. Flowers are of medium size and are borne on long stems, but the special value of this variety is, that it produces its flowers in greatest abundance, while most of the white varieties are shy bloomers..... 50

Cactus Dahlias, continued

5010	Schone Else. A magnificent variety for cutting or garden decoration; bearing flowers on extreme long stems, the plants attain a height of 4½ feet. Flowers are perfect, pure white, with a slight tint of lavender-rose.....	EACH	
5020	Schone Rose. Clear pink, tipped white at the end of petals, center a soft green; petals fine and straight....		\$0 75
5030	Schwan. (1907.) Absolutely the largest and most perfect, and besides the only free-blooming, pure white Cactus Dahlia in existence. The giant flowers are of glistening white and by their narrow twisted petals have an elegance which has not been approached by any other variety. Flowers appear quite early and continue in such profusion that the foliage is almost hidden with flowers. Stems averaging 15 inches carry the flowers far above the foliage. Do not be without this splendid novelty.....		1 00
5040	Schwarzer Samling. Deep black.....		50
5050	Scorpion. Vermilion, lighter at tips.....		1 00
5060	Serpentina. Serpentine coloring.....		50
5070	Sheriff Henderson. Bright rosy salmon; florets nicely twisted; large, fine for exhibition.....		50
5080	Shrewsbury. A lovely primrose-yellow, with very long pointed florets, growing on stiff upright stems.....		50
5090	Sicilia. Rose petals twisted and cut.....		50
5100	Sidney Milk. A most valuable garden variety; in color a deep orange-red; in habit wiry, the stems carrying the flowers well above the foliage; flowers immense.....		50
5110	Siegfried. Pure white. One of the best. Elegant form and very floriferous.....		30
5120	Sieglinde. Bright amber, slightly overtinged soft pink. A perfect shape and good size; very early.....		30
5130	Signal. A very distinct dwarf variety, suitable in every way for border work. Height 3 feet. Very free, long stemmed flowers, large, and beautifully formed; color a bright signal red.....		50
5150	Simoun. Amber and pink. Plants.....	2	50
5170	Sir A. Milner. Bright orange-red.....		50
5180	Sirius. Bright golden yellow ground, heavily striped with scarlet, large and good; florets long and narrow.		50
5190	Sonnencactus. Pure yellow.....		50
5200	Sonnenstrahlen. Beautiful canary-yellow with pure white tips. An exquisite flower of good shape.....		25
5205	Spanish Prince. (1908.) Rosy pink, passing to cream in center; remarkably free-flowering. Plants.....	4	00
5210	Spearmint. Shades of yellow and scarlet. Plants....	1	50
5220	Spitfire. Clear scarlet.....		60
5230	Spotless Queen. Pure white, blooms are freely produced and of medium size. Excellent for cutting.....		25
5240	Stadtobergartner Weiss. Pure white, greenish center; flowers are very substantial; a great point for shipping.		50
5250	Standard Bearer. A medium-sized flower of brightest scarlet. Its great quality is its freedom of flowering..		20
5260	Star. Form is star-like, yet slightly incurved; color bright bronze and yellow.....		50
5270	Starfish. Rich bright scarlet, splendid cactus shape; every bloom perfect.....		35
5280	Starlight. Pure pink.....		75
5290	Stella. Rich vivid crimson; long, but gracefully curled petals. Strong grower; free-blooming.....		20
5300	Sternschnuppe. Old-gold; a most distinct and handsome Dahlia; large flower.....		35
5310	Stern Von Schoneberg. Velvety violet.....		50
5320	Stromboli. Chrome-yellow, striped scarlet. Plants....	2	50

5540	Uplands. Crimson-scarlet. Plants.....	2 00
5550	Up to Date. Soft crimson-pink, tinted purple; perfect shape.....	35
5555	Variabilis. A perfect revelation for a Cactus Dahlia; very free-blooming; the color is most unique and distinct; deep amber-chestnut, tipped white. Plants.....	3 00
5560	Vesta. A beautiful pink flower paler toward the center; of good cactus shape, having long, narrow petals; good size.....	30
5580	Vesuvius. Yellow, striped and speckled crimson; most pleasing effect.....	30
5590	Victory. Fiery red; long narrow florets; grand for the exhibition table.....	3 00
5610	Victorian. Ground color is pinkish white, freely striped and speckled deep crimson and purple; excellent for exhibition.....	75
5620	Victor von Scheffel. Blooms of medium size; color a most delicate flesh-pink, shading to purest white in the center, inner petals distinctly edged; flowers are borne on long stems.....	30
5640	Violetta. Violet-rose, flushed with crimson. A good flower, with petals narrow and tapering.....	50
5650	Viscountess Sherbrooke. Bright reddish terra-cotta, suffused with apricot; very free-flowering and dwarf in habit.....	35
5660	Vivid. Bright orange-scarlet.....	75
5670	Volker. Exquisite golden yellow flowers of immense long narrow petals, giving the appearance of a bright glowing star.....	20
5675	Vulcan (1909.) A fine cactus for garden decoration and cutting, color orange-scarlet, shaded a little darker in the center. Its main quality is the extreme freeness of blooming rivaling the well-known Countess of Lonsdale. Plants.....	5 00
5690	Warjag. Orange-lilac.....	50
5700	W. B. Child. Blackish maroon, shaded purple, a rich color; good-sized flower and elegant shape.....	35
5710	W. E. Dickson. A large exhibition flower with good petal and center; color bright crimson; stem long and strong.....	75

5715 Weisse Dame. (1909.) Undoubtedly the best and most free-blooming white Cactus Dahlia in existence. The flowers are borne on perfect stems and are borne in unlimited profusion. Flowers keep excellent after being cut. Plants.....	EACH \$1 00
5720 White Kriemhilde. (PERLHILDE). White.....	75
5730 White Lady. Pure white of fair form and straight petals.....	75
5740 White Mrs. J. J. Crowe. White.....	35
5750 Winnie Walters. A most beautiful pale yellow flower, tipped with white; very narrow, elegant petals, with habit of growth all that can be desired, throwing well above the foliage on long stiff stalks.....	35
5670 Winsome. Pure white, incurved flower of most delicate appearance.....	35
5770 Wisdom. Bright pink with laciniated petals.....	35
5780 Wm. Cuthbertson. Bright rich crimson-lake, passing toward the tips of the petals to bright carmine.....	50
5790 Wm. Godfrey. Light maroon.....	I 00
5800 Wm. Jowett. Brilliant scarlet. Flowers large and well formed. Strong, robust grower.....	25
5810 Wm. Marshall. A great exhibition sort ; a flower of gigantic dimensions; color rich orange with bright yellow in the center.....	I 00
5815 W. T. Rogers. (1908.) Velvety maroon with a crimson shade; blooms are large and produce freely. Plants..	4 00
5820 Wunderkind. (1907.) A companion to Countess of Lonsdale; when the plants are in full bloom foliage cannot be seen. We counted 142 perfect flowers on one plant at one time; the flower itself is of a most exquisite color, salmon-yellow, overlaid with amethyst; flowers are borne on long stems and are excellent for cutting.....	50
5840 Yellow Gem. Yellow.....	50
5850 Yvonne Cayeux. A most beautiful form, a perfect star shape; petals being located with most exact regularity; color an immaculate white. A large flower and an aquisition of first order among the white Cactus. Plants.....	3 50
5860 Zaunkonig. Very dwarf liliputian cactus; carmine-red, tipped violet.....	I 00
5870 Zephyr. A distinct shade of rosy pink, medium-sized flower of perfect shape.....	25
5880 Zoe. Pure white slightly tinged with green in center. Flowers borne on strong stems.....	50

General Collection of Decorative Dahlias

6000 A. E. Johnson. Pink; distinct form. Plants.....	I 00

6130 Avalanche. White, tinted pink.....	50

Cactus Dahlias, continued

6140	Beaute Lyonnaise. White, tinted and edged scarlet, tipped white. Plants.....	EACH \$1 00
6160	Beauty of Kent. Well-named beautiful in form, color and appearance. Deep crimson-red with distinct pure white tips; most effective and at once catches the eye; free-blooming and fairly large.....	1 00
6150	Beauty of Brentwood. Carmine, tipped white.....	50
6160	Berthe Berthenet. Perfect flowers of a beautiful fresh pink, touched with white. Compact and free blooming.	2 00
6170	Blue Oban. The nearest approach to a blue Decorative Dahlia. A clear lavender-blue.....	35
6180	Boisduval. Violet-red.....	75
6190	Calypso. Yellow, red tip. Plants.....	75
6200	Camellia. A dwarf, bushy plant, attaining a height of 2½ feet, with small but prolific foliage and myriads of medium-sized perfect flowers of a coppery orange. The shape of the flower is just like a camellia and lasts well when cut.....	50
6205	Capitaine Boulot. Beautiful flower, clear salmon-pink, base of a Jonquil yellow; plant dwarf; free-blooming; a very distinct variety.....	2 00
6210	Catherine Duer. The Dahlia of Newport. For effect in artificial light after being cut there is hardly another variety which has more brilliancy; a giant flower borne erect on erect stems with its deep rich glowing red is most effective.....	50
6220	Celestine. Apple blossom. Plants.....	1 00
6221	Charlotte Dossett. Pure white center; cream, magnificent flower.....	1 00
6222	Chrysanthemiste Albert Delaux. Plant of beautiful form, enormous flowers of large flat petals, of a vivid crimson.....	3 00
6230	Claribel. Glowing crimson-violet.....	25
6240	Clifford W. Bruton. Yellow.....	25
6250	Colosse De Bellecour. Plant very dwarf and free-blooming; flowers large and of a beautiful violet, sometimes tipped white.....	2 00
6255	Commandant Guynet. Large flower of a most original form; petals are reefed, forming a puff in center, violet, shading to purple.....	2 00
6260	Commandant Rivoire. A superb flower of immense size; the petals are long and of the true type; the color is quite distinct, deep crimson-purple, with violet reflect toward end often heavily marked with white on edges and tips. The effect is most pleasing; an excellent exhibition sort. Plants.....	2 00
6265	Cora E. Cole. Yellow. Plants.....	75
6270	Croesus. Red.....	50
6280	Decorateur. Garnet, tinted violet on edges.....	50
6290	Delice. New. The finest pink-colored Decorative Dahlia excellent in form; perfect in type; superb yet delicate in coloring, it must appeal at once to every lover of flowers. Color bright pink, suffused with a lavender pink. Plants only.....	1 00
6305	Docteur Serrigny. Very large flower, of soft bluish color, striped violet-purple.....	4 00
6310	Domino. Salmon-orange, often spotted pure white....	75
6330	Don Juan. Canary-yellow. Plants.....	1 50
6340	Duke of Kostritz. Extremely free-blooming, giant flowers, on erect, long stems; excellent form and a magnificent color, delicate pink, edged silver.....	50
6360	Esmeralda. A very massive, deep flower with a very effective coloring, white, shaded and suffused violet; flowers very large.....	75

FIREBURST

	EACH
6370 Ethel Johnson. Yellow, shading red.....	\$0 50
6380 Etoile de Lyon. White garden center. Plants.....	50
6390 Etoile Roannaise. Orange-golden. Plants.....	75
6410 Favorite. White, tinted pink.....	60
6420 Fata Morgana. A free-blooming sort which appears quite early and improves with the season; white edged and tinted rose-violet.....	50
6440 Fireburst. See description on page 13. Green plants only	2 00
6450 Firefly. Most striking variety on account of its color—fiery orange-scarlet with distinct white tips.....	50
6460 Fire King. (Glare of the Garden.) Fiery scarlet; rather small flowering.....	30
6470 Flora. One of the most refined white flowers. The pure glistening white is not disturbed by the least suggestion of green. The flowers are always perfect, borne on extreme, long, erect stems and literally cover the 5-foot plant over its entire surface.....	50
6480 Frederic Spittel. Vermilion-scarlet, often tipped white. Plants.....	1 00
6490 Gabriel Delaon. Giant blooms of dark velvety maroon. Plants.....	1 00
6500 General Gordon. Orange-scarlet. Plants.....	75
6510 Geo. R. Drake. Bronze-yellow.....	1 00
6520 Germania. Wine color, dark velvet, shaded with yellow; flowers on long stems.....	60
6530 Gettysburg. A heavy flower of bright, deep scarlet...	25
6540 Gigantea. Its name suggests the size; truly gigantic and massive in form. The individual petals are short and it requires many to form such a monstrous flower. Color a soft sulphur-yellow; distinct and attractive..	1 00
6560 Gorgeous. Crimson; free-flowering plants.....	1 00
6580 Hattie W. Emerson. Purple.....	50

Gigantea

Decorative Dahlias, continued

	EACH
6590 Henry Patrick. A superb pure white.....	\$0 25
6600 Herman Shubert. Crimson-white, tipped clear violet. Plants.....	I 00
6610 Herzogvon Koestritz. Clear pink, center white.....	60
6615 Jack Rose. See description on page 11. Strong young plants.....	I 00
6620 Jacques Welker. Clear mauve.....	35
6630 Jean Burel. A giant in size, extremely double, thick petaled and built high. Perfect flowers appear in con- stancy and are effective and excellent for cutting. Color a brilliant nasturtium-red. Plants only.....	75
6650 Jeanne Charmet. One of the finest Decorative Dahlias. A seedling of Mme. Van den Dael. The flowers meas- ure 8 inches across and are borne on stiff wiry stems, often 18 inches long. The exquisite flowers are pink at the edges, pure white toward the center and light yellow at the margins.....	50
6660 J. Laborde. Violet-scarlet.....	75
6670 J. M. Goodrich. Lavender. Plants.....	I 50
6680 John Arnold. Rose-violet.....	75
6690 John H. Roach. Deep yellow; long petals.....	20
6700 John R. Baldwin. A splendid garden and exhibition sort. Heavy deep flowers of good size, borne on long stems in the greatest profusion from the earliest sum- mer until late in fall; salmon-pink. Field roots.....	I 50
6710 Jumbo. One of the best for cut-flowers; stout stems, averaging 20 inches; flowers deep crimson, elegant in form and most decorative in vase; very free-blooming.	75
6750 Kaiserin Augusta Victoria. One of the most valuable Dahlias we have. We have thoroughly tried this variety and know what it is. It is particularly valuable for sev- eral reasons. It grows about 30 inches high and does not require any support of any kind. The immense per- fect pure white flowers are borne in great profusion on most erect stout stems, fully 18 inches long all above foliage. No matter how much you cut, it is hard to find	

Jeanne Charmet

Kaiserin Augusta Victoria, continued

- the plant without flowers. For landscape work or general garden use this variety is especially valuable. Planted into the shrub border or even into lawns by themselves they succeed splendidly and make an effect which cannot be duplicated with any other flower. They can be kept in flower until Thanksgiving. . . . \$0 50
- 6770 Kuroki.** A most perfectly formed Dahlia; flowers large and free, lovely clear salmon. . . . 35
- 6800 La France.** Brilliant rose-pink, similar to the rose, with the same name; flowers are gigantic, loosely built and resemble in shape a large double peony. Excellent for exhibition. . . . I 00
- 6810 Lady Hume Campbell.** Purple 50
- 6820 Le Brilliant.** Plant very dwarf; very free; white, edged red through the entire length of petals. Plants. . . . I 00
- 6825 Le Floripere.** Exquisite foliage; flowers striped red and maroon over a soft shade of tan. . . . I 50
- 6826 Le Grand Manitou.** The largest Decorative in existence; white, more or less striped with violet-red and occasionally bears flowers of a solid violet color. . . . 4 00
- 6828 Le Mont Blanc.** Gigantic pure white flowers, supported by petals of great texture. Plants rather dwarf but of good form. This is without doubt the most remarkable Dahlia in existence. . . . 3 00
- 6830 Leon Varigny.** Crimson, tipped white. Plants. . . . 75
- 6840 Le Poitevin.** Scarlet. Plants. . . . 75
- 6850 Les Allies.** White, striped rose and purple. . . . 35
- 6860 Lord Lyndhurst.** Scarlet. . . . 50
- 6870 Lucy Fevrier.** An exquisite Dahlia which should be in every collection; a good full large flower of a beautiful rose shade. Plants only. . . . I 00

Decorative Dahlias, continued

		EACH
6900	Mme. A. Lumiere. Unique coloring; pure white, violet-red points; a fine contrast of colors; very distinct....	\$0 50

6910	Mme. Auguste Nonin. A perfect flower, with fluted petals and of good size; lilac, shaded clear violet....	1 00
6920	Mme. Burel. Soft pink, heavily striped crimson....	75
6930	Mme. Crassart. Salmon, striped scarlet; rather new; of beautiful form and an excellent cut-flower.....	75
6940	Mme. Delaux. Cerise, shaded violet. Plants.....	1 00
6950	Mme. F. Mollard. Purest white; form of Grand Duke Alexis. Pot roots.....	2 00
6960	Mme. Hoste. Nearly scarlet. Plants.....	1 00
6970	Mme. Keller. Orange ground, marbled with fiery red; very interesting coloring; immense flower.....	1 50
6990	Mme. Louis Perrier. A greatly improved Mme. A. Lumiere. The flowers are fully twice as large, better marked and more perfect in shape. The heavy petals overlap and are a clear carmine with white edge; most attractive. Plants.....	2 00
7010	Mme. Mary Collet. Enormous flower; coppery salmon, striped and shaded golden yellow. Plants....	75
7020	Mme. Van den Dael. True. White, flushed lively pink; a loosely formed flower of elegance.....	20
7030	Mme. Victor Vassier. Clear sulphur-yellow.....	1 00
7040	Mlle. Andre Paque. Plant very dwarf; flowers pure white, bordered in exact outline, violet-rose; center petals are loosely incurved and the outside are recurved. Plants.....	75
7060	Mlle. Helene Charvet. A seedling of Mme. Van den Dael only flowers are much larger and florets of enormous width. Color a pure white; strong, vigorous habit.....	1 00
7070	Mlle. Laurence Chabanne. Flesh-pink, tipped and splashed garnet. Plants.....	50
7090	Mlle. Marie Hoste. Light heliotrope, shaded and lined pure white; a very distinct color. Plants.....	75
7100	Mahala Sheriff. Pure white; very double.....	20
7110	Maid of Kent. Cherry-red, tipped white.....	20
7130	Mammouth. Undoubtedly the largest Decorative Dahlia now in existence, surpassing even the wonderful giant, "Souv de Gustave Douzon." In form we cannot imagine a greater perfection. The massive petals are placed in exact regularity and never show an open center. The color is an intense vermilion of a velvety texture; a solid color and exceedingly rich. The plant is dwarf (3 feet) extremely sturdy and produces a very luxuriant foliage; flowers are carried on stout long stems, showing the face on a slant, giving you an opportunity to admire it to the fullest extent without handling it. The best creation in this line. Green plants.....	10 00
7150	Marguerite. Maroon, tipped white.....	75
7155	Marocco. Maroon, shaded purple.....	1 00
7157	Matador Soft scarlet.....	50
7160	Memoriae Margaritae. Immense flower of a deep velvety maroon.....	3 00
7180	Minos. Dark velvety maroon.....	1 00
7185	Miss Geraldine Farrar. (By special permission of Miss Farrar.) The decorative form and the color of this flower is distinct and original and unlike anything we have ever seen. The form is that of a full double peony, blown open. The petals are very massive and broad and remain fresh-looking for an exceedingly long time.	

Mrs. Roosevelt

Miss Geraldine Farrar, continued

The plant itself is rather dwarf, $3\frac{1}{2}$ feet high, but produces quite a large number of these giant blooms often 7 inches across. The color is that of a fresh rosy pink modestly flamed white toward the tip of the petal, giving the flower a most pleasing appearance. This variety will be a surprise to every Dahlia lover and no doubt will become extremely popular. Green plants only. (Delivery May 15.).....

King Leopold (see page 51)

General Collection of Single Giant Dahlias

- 11180 Merry Widow.** (LUSTIGE WITTWE.) This variety is well named and has some valuable features. The plant attains a height of only 3 feet and from the bushy plant arise from 30 to 50 gigantic deep scarlet flowers on stems 15 inches long and measuring invariably 4 to 5 inches. The color is exceedingly bright and a single plant makes an effective showing. This is one of the latest novelties and very limited. Plants.....\$3 00
- 11450 Chameleon.** In our estimation the most wonderful Dahlia and fully deserves the name it carries. At one time last season we counted no less than 28 blooms on one plant and not one flower was in color alike to another. In fact, could record the following variation: Solid scarlet, solid yellow, solid white and solid flesh-pink, scarlet with white tip, half flower scarlet and half white, every imaginable percentage of one and another; yellow with red stripe, white with red stripe and several petals with a solid scarlet. Plants..... 2 00

11455	Commandeur Bombrini.	Light yellow, washed with scarlet. Plants.....	EACH \$1 50
11500	Dreadnought.	Rosy red, yellow ring. Plants only..	2 00
11510	Dr. E. Posongi.	Dull red, tipped yellow. Plants only..	1 00
11540	Golden Glory.	Clear yellow. Plants only.....	2 00
11550	Grafyn Wydenbruch.	Maroon, tips and center white.	75
11560	Harvard.	Crimson.....	75
11565	Herman Bazlen.	Orange, edged leather. Plants only.	75
11570	H. Zeuner.	Dull carmine. Plants.....	75
11580	Imperialiana.	New. Originated at Newport, where it is extremely popular; a truly gigantic flower, deep clear pink, very attractive in artificial light, has long strong, stiff stem. Was awarded a silver medal as a seedling by the Newport Horticultural Society in 1905.....	I 00
11590	Junker Kai.	Brilliant scarlet tips, center white. Plants.....	75
11600	Lily Ensinger.	Deep rose, shaded lilac. Plants.....	75
11610	M. Jacques Serraire.	White passing to rose. Plants.	I 50
11612	Madame Anthelme Combet.	Pure white, rounded petals.....	75
11615	Newport Beauty.	New. By the same originator as the Imperialiana; rich crimson, shading lighter to the points of florets, which are somewhat pointed; large, with excellent stems; was awarded a first-class certificate of merit at Newport, 1903. Plants.....	I 00
11617	Satania.	Orange, fringed petals.....	I 50
11620	Souvenir de Paris.	Pure white. Plants.....	I 00
11625	Theodor Korner.	Brilliant scarlet, yellow center....	75
11630	Zugspitze.	Citron-yellow, faintly striped scarlet....	75

New 20th Century Dahlias

A giant single of distinct type

11640	Twentieth Century Type.	Intense rosy crimson, with white tips and white disc around the yellow center. Strong roots.....	EACH \$0 20
11650	Crimson Century.	Very large; color deep glowing crimson, shaded darker, tipped rose with rose disc. Strong roots.....	50
11660	Lavender Century.	Very large delicate lavender, with a deeper shaded band around the center, after the manner of Twentieth Century. Profuse bloomer. Fine strong roots.....	50
11670	Maroon Century.	Maroon. Plants.....	50
11680	Pink Century.	The largest of the orchid-flowered Dahlias to date. In size this is 6½ to 8 inches across; its color is delicate shell-pink. Stock is very limited. Fine strong roots.....	I 00
11690	Scarlet Century.	Splendid; the color is the brightest dazzling scarlet without shade or blemish. The flowers are immense fine round form and finish. Fine, strong roots.....	50
11700	White Century.	Probably one of the finest. The blooms are gigantic and of beautiful snow-white color. Strong roots.....	50

Single Colossal Dahlias

A new type of our own; flowers of immense size on long stems

11800	Cambridge.	In form and size this variety is identical with the Hub but its color is most unique, a true Harvard crimson, with a broad golden ring in the center; the effect is marvelous. Height of plant 5 feet. Green plants only.....	EACH \$2 00
--------------	-------------------	---	----------------

Maurice Rivoire

Single Colossal Dahlias, continued

- 11850 The Hub.** Flowers are never less than 5 inches across and often 6 inches. The petals are broad and massive and have a light-colored base, thereby creating a perfect ring in the center which gives the entire flower an enhancing beauty. Color deep rose, edged and tipped white, with a very broad base of yellow, changing to white; the petals are pointed toward the tips, producing a star-like effect. Plants grow 4 feet high and have a luxuriant light green foliage. We are certain every Dahlia connoisseur will admire this novelty. Green plants only.....**\$2 00** EACH

General Collection of Collarette Dahlias

This type originated in France and has found many admirers in the United States. From the few plants we grew at our farm last season to try-out we have booked so many advance orders that we decided to list all we could possibly obtain in Europe.

- 12000 Ami Cachat.** Scarlet, yellow collar. Plants.....**\$1 50** EACH
12010 Comte Cheremeteff. Vermilion-red, tipped orange.
 Plants..... **75**
12020 Comte Nodler. Vivid scarlet, yellow center, wavy
 white collar..... **1 50**

12030 Corbeille de Feu. Exceedingly free-blooming. The cardinal flowers are enhanced by a collar which is of the same color, with an addition of a bright yellow tip, thus creating a flame effect, which is very pretty. Plants.....	EACH \$1 50
12035 Duchesse Melzi D'Eril. Yellow, tinted orange, washed and striped scarlet, collar white with pinkish tint. Plants.....	I 00
12040 Etendard de Lyon. Velvety scarlet, collar cream at base, white at tip. Plants.....	75
12050 Exposition de Lyon. Rich garnet color, yellow collarette. Plants.....	I 00
